Public portfolio review copy. Publication approval pending.

PROFILE

AV Systems Engineer with hands-on federal and enterprise AV/VTC support, systems integration, signal-flow troubleshooting and technical mentoring. Software project owner building Linux, cloud and AI engineering skills through personal labs, training and AI-assisted development. Active DoD Secret Security Clearance.

PROFESSIONAL EXPERIENCE

Mid-Level AV Systems Engineer
Geospatial and Cloud Analytics (GCA)
June 2026 - Present

- Integrate and troubleshoot multi-vendor AV systems, networked endpoints, DSP, video distribution, cameras and conferencing technology.

- Use signal-flow, HDCP/EDID and connectivity diagnosis; support AV drawings, bills of materials, service coordination and technician mentoring.

Junior AV Technician / AV Technician Intern
Geospatial and Cloud Analytics (GCA)
May 2025 - June 2026 (grouped roles; school-term break)

- Supported AV/VTC troubleshooting, equipment integration and networked AV endpoints.

- Supplied records group both roles in this range. Exact role transition dates and continuous employment are not inferred.

In-Class AV Assistant
Virginia Commonwealth University
September - December 2025

- Supported classroom AV, Zoom and Microsoft Teams hybrid sessions, instructors and Executive MBA sessions.

CORE COMPETENCIES

AV systems integration | AV-over-IP | Crestron | Extron | AMX | Dante | DSP | HDCP/EDID | Technical mentoring | Linux lab administration | KVM/QEMU | Python and TypeScript project development

Technical work & learning

Mid-Level AV Systems Engineer

SELECTED PROJECTS

Crestron NVX diagnosis - Owner-reported restored video after correcting encoder/decoder roles; sanitized completed case study.

OptiPlex Linux infrastructure - Ubuntu, SSH and KVM/QEMU personal lab. Prometheus, Grafana and Uptime Kuma installed, owner-reported pending artifacts; monitoring reliability not yet evidenced.

Vector Learning - Founder and lead developer of a technical-learning product in development. Current public feature scope remains unverified; private implementation details are excluded.

AV Portfolio Suite / AV Integrity Lab / Cloud Task Suite - Separate local software prototypes with bounded automated checks. Simulated AV data, configuration comparison and Flask/SQLite learning work; no production deployment is claimed.

AV Operations Command Center - Existing Base44 platform prototype. Seven entity schemas inspected; source, runtime acceptance and public deployment remain unverified.

Engineering portfolio - Content-driven Next.js/React/TypeScript static portfolio, implemented with AI assistance. Owner review, exercises and ongoing maintenance tracked separately.

SELECTED CREDENTIALS & TRAINING

Selected completed credentials and training are owner-reported in the supplied records. Issuer verification links and earned dates are pending. Vendor training is distinct from professional certification.

- AVIXA CAVT (certification)
- Audinate Dante Level 3; Crestron DMC-E, Commercial and Residential Technician, Modern Workplace (vendor training)
- Extron ECS, NAV, ProDSP, Global Configurator Plus, GUI Designer, AV Associate (vendor training)
- AMX Technician and Designer; NETGEAR NCE, NCE-AV and AV Levels 1-3; Q-SYS Level 0 (vendor training)
- Sennheiser RF Basics; Cisco Network Technician Career Path; Microsoft Azure, AI, Security and Security Copilot coursework (training)

EDUCATION

J. Sargeant Reynolds Community College | Associate of Science - Social Sciences, May 2024

Virginia Commonwealth University | Computer Science coursework; no Computer Science degree claimed.
